

KAJTO

A product by **T-Systems**·*onsite*

A modelling application with
parametric & process continuity –
tailored for Class-A workflow

OUR BENEFITS

Halved time exposure

Working efficiently due to parametric modelling and the reusability of modules. No more data leakage.

High display quality

Tailored for Class-A workflow KAJTO offers the perfect surface for applications in automotive industry.

Intuitive implementation

Full functional scopes due to the integration into Rhino 3D at decreased complexity of the user interface.

Tool continuity

Continuous work: From construction, to modelling, to the final visualisation – all within one and the same tool.
